Prof. Dylan Small  
JASA Theory and Methods Co-Editor

Dear Prof. Small,

On behalf of my co-authors Kyle Stanley, Jeffrey S. Morris, Giles Hooker and I, please find enclosed our invited commentary on Deep Fréchet Regression by Iao, Zhou, and Müller (2025), which we presented as a discussion at the 2026 Joint Statistical Meetings (JSM). We are very grateful for the opportunity and forum to discuss this important piece of work.

I confirm that the work has not been published or submitted for consideration for publication elsewhere and all authors have read and approved the final version. The manuscript adheres to the prescribed limit of 8 pages for an invited comment (including the abstract, references and figures, but excluding the title page). In line with the JASA reproducibility policy, we have prepared a **GitHub** repository containing code to reproduce the results of the example in the manuscript<sup>1</sup>.

Thank you for your consideration of our work.

Yours sincerely,

 Edward Gunning
